

WINNICA TURNAU HIBERNAL 2024

WINE DESCRIPTION

A semi-dry wine from the late-ripening Hiberna variety. The grapes need a lot of time to develop the right amount of sugar and the characteristic floral and citrus aromas. It transfers its aroma to the wine, creating an intense composition of jasmine and sweet mandarin. On the palate it is full of pear sweetness, but balanced by a pleasant lime acidity that beautifully harmonizes with the sweet and sour flavors of Asian cuisine

WINE AROMAS

flowers, tangerines

TASTE OF WINE

citrus, pear

FOODPAIRING

aperitif, fish, pasta, white meat, salads

WINE PARAMETERS

residual sugar: 16,2 g/l

acidity: 8 g/l

alcohol content: 11,0%

GRAPE VARIETIES

hibernal

VINIFICATION

Fermentation in stainless steel tanks

AWC Vienna 16' silver

Wine Contest Bucharest gold

TERROIR

Winnica Turnau is located in Baniewice, in the southwestern part of the West Pomeranian Voivodeship. This unique region is influenced by air masses from the Atlantic Ocean and the Baltic Sea, as well as the proximity of the Oder River. All these factors shape a climate characterized by a long growing season, warm summers, and mild winters. Such conditions favor the cultivation of demanding grape varieties, allowing them to reach optimal ripeness while maintaining high acidity. Our region is distinguished by a rich network of oxbow lakes, gently rolling moraine hills, and an abundance of flora and fauna. The vineyard is situated on a moraine hill, where the predominant soils are sandy-clay, clay, moderately compact, and moderately permeable. This terroir, combined with ecological viticulture, results in grapes of exceptionally high quality.

WEATHER DURING THE GROWING PERIOD

Winter 2023/2024 was frosty, with little snow cover. The beginning of spring was quite warm, which allowed vegetation to start much earlier than in previous years. In April, there was a week-long frost with high negative temperatures, reaching even -8 degrees. May was quite warm and dry. July was the rainy. Harvest started earlier than usual (mid-August) and ended in early October.
